# EV CHARGING POINT

A SEAMLESS PLUG & CHARGE EXPERIENCE

# EV CHARGING POINT

A SEAMLESS PLUG & CHARGE EXPERIENCE

Introducing **evCHARGEPOINT** from ANPR International, an intelligent and durable electric vehicle charging point solution, with a future proof design, providing reliable EV charging with low costs for your business, regardless of the environment in which it is installed.

## SMART SOLUTION

**evCHARGEPOINT** is an ultra modern EV charging solution, its sleek design and advanced technology means longevity is guaranteed. Our **evCHARGEPOINT** comes with a secure cloud based remote management system making it easy to pair with existing apps, loyalty programs, customer portals or point of use charging schemes.

## ANY ENVIRONMENT

The contemporary appearance and powerful single or dual charging functionality of **evCHARGEPOINT** means our product will not only bring great functionality to your site but will also act as a modern feature to any environment; retailers, fleets, car parks and more.

## USER FRIENDLY

The **evCHARGEPOINT** Plug & Charge experience allows for easy, secure and effortless charging. Payments are accepted via a secure User Identification System with RFID, Mobile or NFC.

## WORKPLACE CHARGING

**evCHARGEPOINT** at the workplace brings many benefits to your organisation!

- Significantly reduces travel expenditure
- Increased employee satisfaction
- Achieve sustainability goals
- Enhance your green credentials

Studies have shown that employees are 20x more likely to purchase a plug in vehicle if a charging infrastructure is installed at their work place.

**evCHARGEPOINT** is manufactured using high quality industrial strength components with a robust steel structure. It is also fully compliant with European Regulations.

## BENEFITS OF evCHARGE POINT

-  **Contributes to an improvement in air quality**
-  **Generates revenue from usage**
-  **OLEV Approved - Allows access to Government grants**
-  **Advertising opportunities**

**evCHARGEPOINT** default features:

- LED Light showing the charging status (Red, Green, Blue)
- RFID/NFC card reader
- Maximum of 22kW per socket
- LAN connectivity
- Android & iPhone compatible

## HOW DOES IT WORK?

**evCHARGEPOINT** is a super simple experience for any user/motorist. The charging cable is connected to the vehicle and the **evCHARGEPOINT**. Once connected interaction with the **evCHARGEPOINT** is easy; the motorist simply identifies themselves, using RFID/NFC or mobile phone, which will automatically register them with the relevant back office system, the LED light flashes blue indicating charging has commenced, making for an efficient Plug & Charge experience.
